

Home Occupation User Guide

As technological advances are made, more people are working from home. Some people also run small businesses from their homes. These are called home occupations, or home-based business, and are allowed with approval by the Town's Planning Department via a home occupation permit. While the Town fully supports these creative uses, the Town is also charged with ensuring that a home occupation does not conflict with the intent of the property or create a negative impact to the neighborhood. For these reasons, there are standards that must be met for a home occupation to be approved.

A home occupation is defined by the occupation or activity, which is clearly incidental and secondary to the use on the premises as a residential dwelling, does not change the character of the home, does not alter the exterior of the property or affect the residential character of the neighborhood, and meets all applicable requirements of the Ordinance.
